LIQUOR STORES POS SYSTEM
WINE WIZARD

Wine Wizard is a complete POS Solution for a Liquor Store with complete Liquor store/Wholesale management system including Point of Sale, Accounting and Inventory Control, all integrated into one solution i.e. TALLY.ERP9.

Fast Point of Sale

Process credit cards in less than a second. Use barcode scanners and touch screens for super fast entry. We know how busy a liquor/beer/wine store can get, especially around the holidays, i.e. why we focus on the speed of transaction.

Strong Inventory Control

Inventory control is one of the most crucial point for any liquor store. Wine Wizard will keep track of how much inventory you have, what you need to purchase and help you count your stock. You can also adjust your required inventory for seasonal variations.

Train your staff in minutes

In a retail environment like this, you may experience a lot of staff turnover or temporary help during holidays, etc. Train your staff how to make a sale in as little as than 15 minutes. And if the staff is already conversed with TALLY.ERP9 then the learning process will be matter of an hour which will alone pay for the cost of the system.

Access and analyze information in real-time

Various reports have been provided with robust query and filter tools which makes it easy to search, locate and analyze the exact information you need, when you need it. The reports provided are:
- ✓ Sales person wise sales in- Bottles / Litres.
- ✓ Counter wise sales in- Bottles / Litres.
- ✓ Counter wise cash collection.

Improve business performance

Maintain tight control over goals, sales and spending: Create and manage budgets, accurately monitor and forecast cash flow, increase sales by identifying top customers and prospects and control costs by managing vendor relationships and inventory levels.

So easy…..it's a breeze

The system is completely free from installation procedure just because it's completely implemented inside TALLY.ERP9 i.e. its gets activated by simply configuring the system in Tally from TDL configuration which makes it hassle free to use the system.

Fully Integrated Accounting

At the end of the day, when the sales are done, the accounting is finished too. No need to spend hours to enter the data into some other accounting program. Your whole year end data also gets ready in a snap. It is because of the reason that the whole system is incorporated inside Tally.ERP9 which makes the whole accounting process automated.

Work with reliability and security

The security control feature of Tally.ERP9 is a boost to the system which provides various benefits:
- ✓ User wise security controls.
- ✓ Disallowing sales on DRY day or Govt. notifies days.

OPTIONAL HARDWARE

Barcode Scanner

Laser / Thermal printers for invoice printing and bar code labels.

Receipt/Invoice printer.

Wireless handheld units.

- Prompting when a particular category has been billed more than specified limit in a single bill.
